Subject Index

A human blood group
- A_{bantu} phenotype 537

A human blood group antigen
- dosage studies automatic technique 199
- high H antigen A_1 persons 374
- immunodiffusion studies 147

A_{bantu} human blood group phenotype
- population and family studies 537

A_{int} human blood group antigen
- definition 383

ABO human blood group system
- phenotypes in Uganda 74
- quantitative agglutination 238

Ag human serum protein group
- inheritance 485

Albumin, human
- heating 457
- repeated heating 415

Antiglobulins, human
- classification 86
- 'new' type 86

Antiglobulin test
- low ionic strength medium 53

Antiglobulin test, PVP-AutoAnalyzer
- ABO incompatible babies 326
- acquired haemolytic anaemia 305
- alloantibodies 289

Au^a human blood group antigen
- suppression in Lu(a–b–) phenotype 283

Autoimmune haemolytic anaemia
- PVP-AutoAnalyzer system 305

B human blood group antibodies
- *Salmonidae* roe protectins 176

B human blood group antibody
- absence in healthy A_1 person 247

B human blood group antigen
- 'new' variant 189

Blood group reactive substances
- marine invertebrates 385

Blood preservation
- immunocompetent lymphocytes in frozen blood 513

Bombay human blood group phenotype
- comparison with Rh_{null} 272

C1 esterase inhibitor
- preparation for clinical use 118

Cad antigen
- inheritance 462
- *Salvia* agglutinins 163
- Thai blood donors 462

Chronic lymphatic leukaemia antigen
- malignant haematological diseases 141

Cirrhosis
- anti-T agglutinin 83

Cross-matching
- rapid antiglobulin test 53

Donor screening
- alanin aminotransferase (GPT) 265
- value biochemical tests 392

Erythrocyte aging
- effect on proteins 1 membrane

Erythrocyte antibodies
- prevalence 551
- rapid screening 53
- significance 551

Erythrocyte antigens
- antigenic potency in pregnancy 551
- antigenic potency in transfusion 551
- association with HL-A 97
- dosage studies automatic technique 199

Erythrocyte electrophoresis
- effect of pH and ionic strength 14

Erythrocyte membrane
- alteration by autologous leukocytes 344
- neuraminidase activity 497

Erythrocyte membrane antigens
- immunodiffusion studies 147

Erythrocyte membrane proteins
- effect of aging 1

Erythrocyte preservation
- immunocompetent lymphocytes 513
- washed erythrocytes 66
Erythrocyte washing
- closed system 66

FAR
- 'new' private antigen 194
Fibroblasts
- P human blood group antigens 518

Gc system
- 'new' variant (Gc Opava) 157
Gm (Ray)
- description 133
Granulocyte electrophoresis
- effect of pH, ionic strength and ALG 14
GVH reaction
- frozen blood 513

H human blood group antigen
- high content in A_1 persons 374
H human blood group substance
- relation erythrocyte membrane glycoproteins 405
Haemolytic disease newborn
- ABO incompatibility, prenatal testing 439
- cord erythrocytes in ABO incompatibility 326
HB antibody detection
- international survey counterimmunoelectrophoresis 128
HB antigen detection
- changes in patients 276
- international survey counterimmunoelectrophoresis 128
HB antigen morphology
- influence of complement 222
HB antigen radioimmunoassay
- kinetic studies 209
HB antigen screening
- prophylactic effect 368
Hepatitis
- reduction due to HB antigen testing 368
Hey human erythrocyte antigen
- 'new' private antigen 41
HL-A antigens
- differences kidney cells/lymphocytes 107
- erythrocytes 97
- Japanese 449
- kidney cells 107
- micro-immune adherence assay 107
HL-A system
- relation to immune reactivity 470

i human blood group antigen
- suppression in Lu(a−b−) phenotype 283
I human blood group substance
- chemical properties 227
- isolation 227
IgA
- antibodies against IgA in childhood 45
IgG_3 human
- new allotypic marker 133
Immune adherence
- kidney cells 107
- monkey erythrocytes 91
Immune reactivity
- relation to HL-A and Rh 470
Immunodeficiency
- anti-IgA antibodies 45
- transfusion with frozen blood 513
Immunoglobulin G
- anticomplementary activity 560
- freeze-drying 560
- stability 560
Immunoglobulin G allotype
- Gm (Ray) antigenic marker 133
In^a human blood group antigen
- India 400
Invertebrates
- blood-group-like substances 385

K human blood group system
- K:−13 phenotype 34
- 'new' antibody: anti-K13 34

Le human blood group system
- Le^x antigen 425
Lectins
- agglutinins *Salvia* 163
- *Vicia unijuga* (anti-N) 167

Leukaemia
– CLL antigen 141
Leukocyte enzymes
– antigenic alteration erythrocytes 344
Lu 9 human blood group antigen
– weak antigen in Lu:–6 person 94
Lu human blood group system
– recessive Lu(a−b−) phenotype 259
Lu(a−b−) dominant phenotype
– suppression of Au^a, i, P_1 283
Lymphocyte electrophoresis
– effect of pH, ionic strength and ALG 14
Lymphocyte purification
– 'faggot' method 62
Lymphocytes
– culture after long journey 396
– immunocompetence in frozen blood 513

M human blood group antigen
– human lymphocytes 467
MNSs human blood group system
– antigens in Tn-erythrocytes 171
– anti-N agglutinin *Vicia* 167
– linkage 'FAR' antigen 194
Monkey erythrocytes
– immune adherence 91

N human blood group antigen
– anti-N agglutinin *Vicia* 167

O_h human blood group phenotype
– comparison with Rh_{null} 272

P human blood group antigens
– biosynthesis 518
– fibroblasts 518
– p phenotype Japanese family 565
P_1 human blood group antigen
– suppression in Lu(a–b–) phenotype 283
P^k human blood group antigen
– presence on fibroblasts of P^k negative persons 518
P human blood group system
– *Salmonidae* roe protectins 176
Plant agglutinins
– *Salvia* 163
– *Vicia 167*
Polyagglutination
– MN antigens 171
– rapid elucidation scheme 163
– *Salvia* agglutinins 163
'Private' human erythrocyte antigen
– 'FAR' 194
– 'new' antigen: Hey 41
– To^a 280

Quantitative agglutination
– ABO incompatible babies 326
– ABO system 238
– acquired haemolytic anaemia 305
– alloantibodies 289, 305
– anti-D concentration 334
– erythrocyte antigen dosage 199

Rh human blood group system
– relation to immune reactivity 470
Rh(D) antibody quantitation
– reproducibility automatic agglutination technique 334
Rh(D) human blood group antigen
– phenotypes in Uganda 74
Rh(D) immunization prevention
– induced abortion 361
– selecting risk cases in pregnancy 26
– treatment during pregnancy 26
Rh_{null} human blood group phenotype
– comparison with Bombay phenotype 272

Salmonidae roe protectins
– anti-B/P/P^k activity 176
Serum enzymes
– donor screening 265

T human erythrocyte antigen
– anti-T in cirrhosis 83
Tn antigen
– *Salvia* agglutinins 163
Tn polyagglutination
– antigens MN system 171
To^a human blood group antigen
– third example 280
Transfusion hepatitis
– effect of HB antigen screening 368
